# News Release

## **Pathfinder Irrigation District Announces Early Water Run**

The District will begin taking water down the laterals on May 13<sup>th</sup>. Early water will start to be available to customers around May 14<sup>th</sup> and May 15<sup>th</sup>, depending on the District's ability to get laterals cleaned for delivery. We anticipate having water available for delivery for approximately 15 days, depending on demand and water levels in the lakes.

The Bureau of Reclamation is currently projecting a full water supply for 2024. Should conditions change, the District will adjust its plans accordingly. While the water supply outlook is adequate, we value the role of our farmers and encourage them to work with the District to manage and conserve as much water as possible. We are always just one bad snowpack year away from a short water season. Carryover into the next year gets us through those bad snowpack years.

Information concerning water operations can also be found on the District's website at [www.pathfinderirrigation.com](http://www.pathfinderirrigation.com).

**For Immediate Release**
