Pathfinder Irrigation District

News Release

Pathfinder Irrigation District Announces Shutdown Schedule for Irrigation Deliveries.

Mitchell, Nebraska, September 5, 2019: The Pathfinder Irrigation District will begin shutting down the Interstate Canal system on September 20, 2019, flows into the canal will terminate on September 21, 2019. Deliveries from the Main Canal will terminate as canal levels drop between September 21st and September 23rd. The flows in the High Line, Low Line and Supply Canals will be shut down on the afternoon of September 21st, deliveries from these canals will terminate as the water levels in the canals drop. Water users should schedule their final irrigation accordingly and contact their ditchrider as the shutdown proceeds to know when deliveries to their farm will terminate.

The District would like to commend its water users for a good water season and we look forward to serving you in 2020. Carryover will be well above average for the end of the irrigation season, so the water supply for next year looks very promising.
